**“Teachers are one of the most influential and powerful forces for equity, access and quality in education and key to sustainable global development.”**

# It's All About You

Our revered teachers work tirelessly day and night for the success of their students. However, when it comes to teachers' own career success, majority of them are unaware about their growth aspects.

The Suraasa team talked with over 80,000 teachers, only to discover that vast majority of them are unaware about some amazing growth possibilities available in the teaching profession. Moreover, fresh talent and even professionals from non-teaching careers, who aspire to become educators, lack clear answers about launching a successful teaching career.

We decided to pour in our years of research and expertise to support freshers, existing teachers and career switchers to succeed in this critical career. Thus, Suraasa's core team set out on a mission to provide motivated and determined individuals with the two top factors that separated high-achieving educators from the rest:

- Continuous research and practice of updated pedagogy skills
- Experimentation in practices under constant guidance of experts

We introduce you to Suraasa, an international organization that helps teachers achieve greater professional and financial growth in their careers. We equip teachers with the pedagogical skills and resources that enable them to experience career satisfaction and continuous advancement.

We brought together leading educationists, cognitive scientists, thought leaders, and technologists from around the world, to build world-class teacher education system which leverages Suraasa's teacher skill framework with global relevance and Suraasa's cognitive learning technology that extends lifetime support to teachers to:

**Learn Comfortably**

**Grow Exponentially**

Minutes of Learning

“Education, like every other industry, is very dynamic. The technology, the students, what the students need to be taught keeps changing rapidly. It is as important for a teachers to acquire the right skills (beyond subject knowledge) to excel in their career, as it is for an engineer, designer, artist, or entrepreneur.”

Rishabh Khanna,
